

In **2003** a local physician began with the construction of a small hospital. However, the funding was running short fast, and only 3 buildings could be structurally completed. Since we were not satisfied with the medical health care in Msambweni, and since we did not want to witness any longer that people do not receive adequate medical care due to lack of means, it was one of our most urgent desires to provide primary health care in one of the poorest areas of Kenya.

In **2008** it was certain that Projekt Schwarz-Weiß e.V will support and pursue the begun hospital project.

In **2009** the hospital premises became the property of the Nice-View-Trust-Foundation which was founded for this purpose. With this the basis for the support by the non-profit association was established, and the construction work could be reassumed. A gate was placed and the plot was enclosed. Since only a beaten path was going to the hospital, an approximately 700 meters long and 4 meters wide path to the hospital was constructed. Geographically the hospital is located in the center of Msambweni.

In **2010** the dimension of the hospital became clearly visible. There are various treatment rooms, an aseptic theatre, a non-sterile theatre for minor surgical interventions, a delivery room, patient rooms with wet rooms, a laboratory for numerous blood examinations, etc.

**Until 2014:**

After the initial idea to operate the medical centre together with a physician from Msambweni failed, the search for a hospital management was not successful for a long time.
