

I am Lavender and one of the older children of Nice View. During the corona pandemic I had to stop my studies at university and came home to help my siblings in learning and activities and also support the family life like my other older siblings.

I am a leader for a group also and the group is **HEROES GROUP**

Focused on improving on our studies and working on our difficult areas as far as studies is concerned.

**BIBLE VERSE: LUKE 1:37**

**FOR WITH GOD EVERYTHING IS POSSIBLE.**

Our group is basically dealing with our difficult areas of studies. We are coming up with ways that will help each of our members improve on their difficult areas by encouraging each of us to try their level best and improve on where there are weak on.

These measures include.

1. Assigning work to each member on the subjects they are weak on example mathematics papers to the members who are weak in math and sending them to the responsible source of help.
2. We also encourage others through personal and inspiring experiences.
3. We follow some educational documents on the internet for necessary help through the help of other Schools associations.

We hope that all our children do their best in school and motivate themselves throughout their studies session this then can raise very able societies of people who are both educational oriented and all rounded personalities.

We do not want our members to be perfect, we want them to their best, and believe that they are heroes and can do it any way.

Our future plan as a group is to recruit other members with the same related problems and help each other to work on them.

We want all our children to focus on their studies because that is their future and they need it that is why we are raising up their potentialities in all areas

**OUR MOTTO**

**WE ARE ALL HEROES, THE SKY IS THE LIMIT.**
